- **Problem Statement Title- Student Innovation**
- **Theme- Robotics & Drone**
- **PS Category- Software**
- **Team Name- CodeGen**

IDEA TITLE

❖ CivicPulse – Smart Civic Issue Reporting Platform

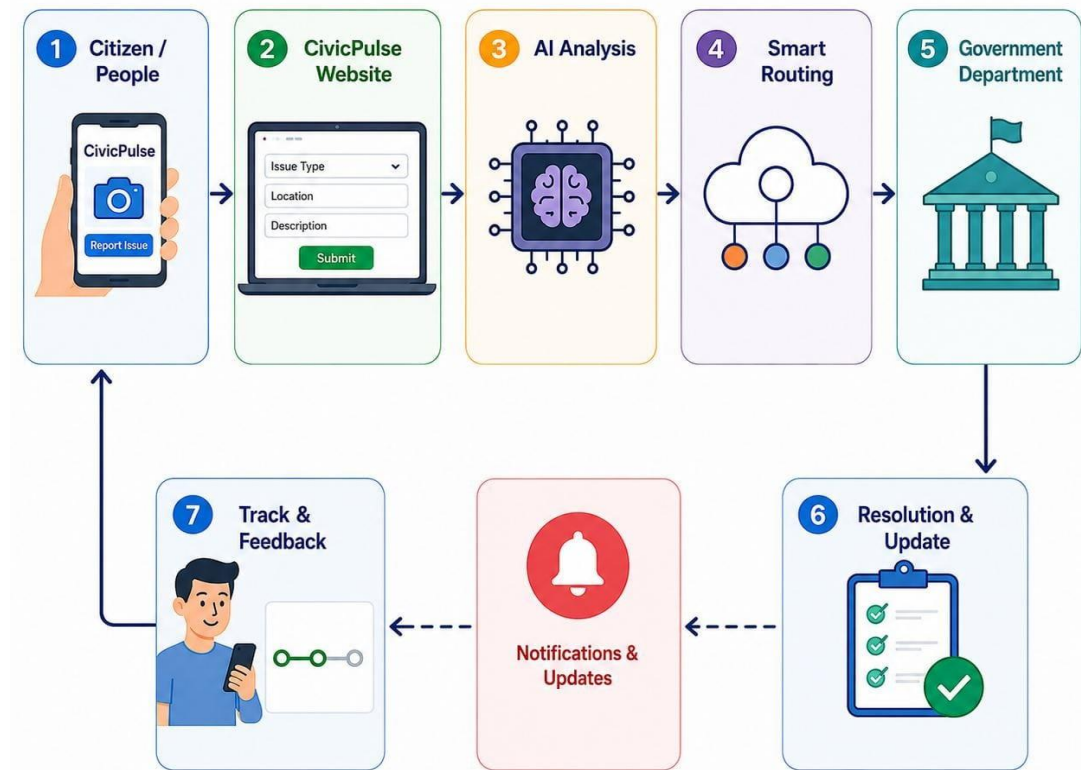

Citizens report civic problems by uploading photos.

AI identifies and categorizes the issue.

Complaints reach the right department faster.

Citizens can track complaint status.

Unique: AI makes reporting faster and smarter.

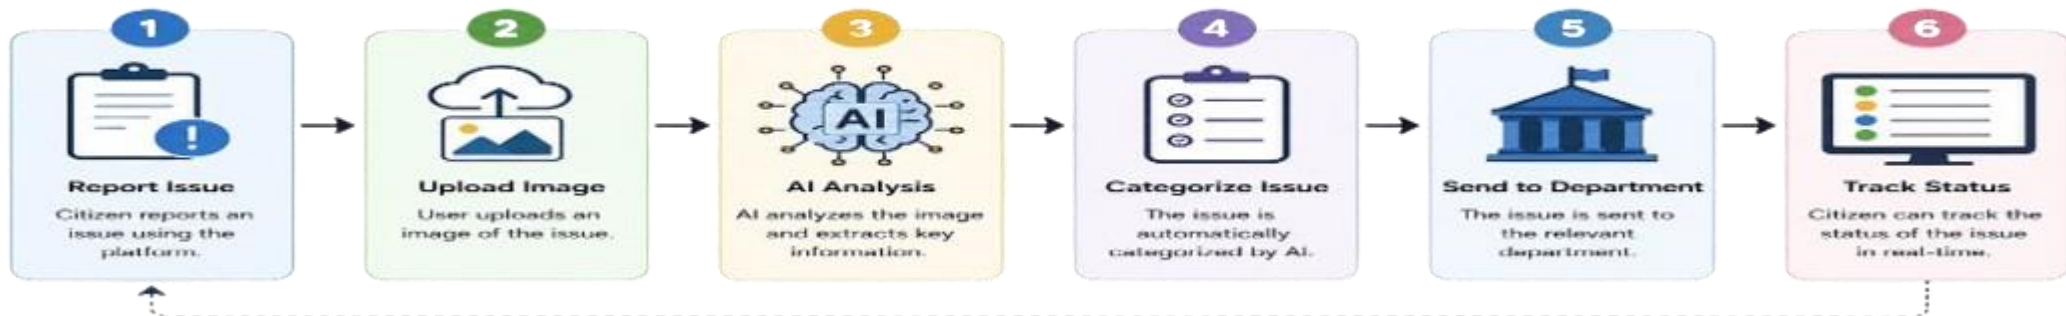

TECHNICAL APPROACH

- **Technologies Used :**

- GitHub
- Python
- VS Code
- SQL
- Figma/Lovable.dev
- Claude

IMPLEMENTATION FLOW

FEASIBILITY AND VIABILITY

Feasibility

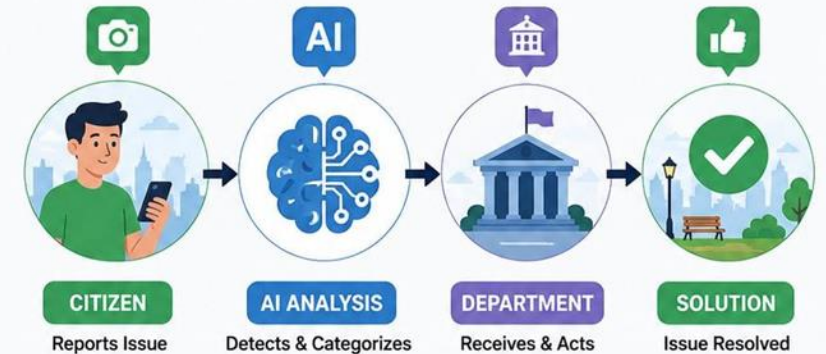

Easy to develop using existing web .
AI technologies Low-cost and scalable.

Challenges

Incorrect AI detection Fake or duplicate complaints.

Solutions

Improve AI with better training data.
Add complaint verification and tracking.

GitHub

VS Code

HTML

Backend

AI Image
Analysis

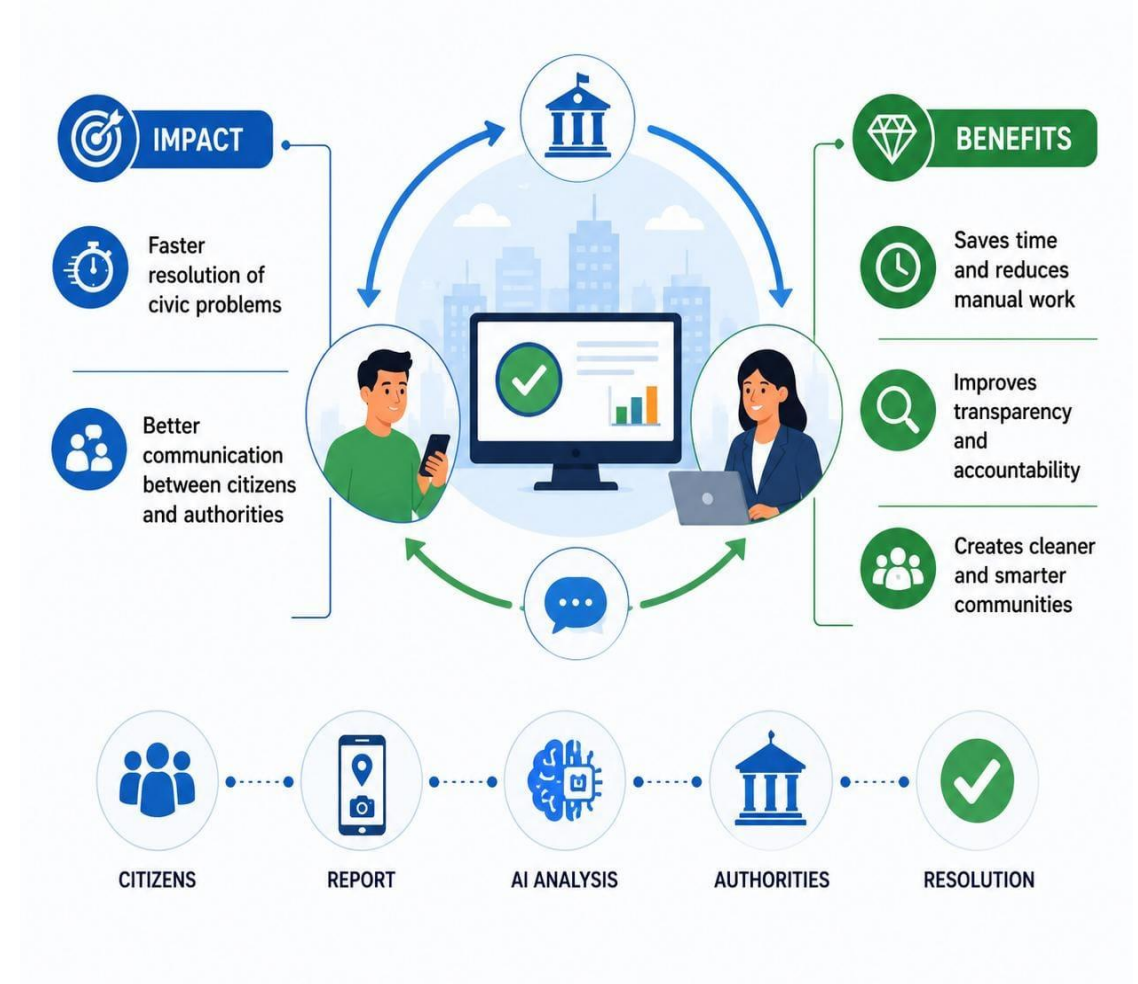

IMPACT AND BENEFITS

Impact

Faster resolution of civic problems.
Better communication between citizens and authorities.

Benefits

Saves time and reduces manual work.
Improves transparency and accountability.
Creates cleaner and smarter communities.
